

TESTIMONIAL - Romeoville, IL Warehouse Clean-out

"The tenant definitely left us with an incredible mess – a warehouse filled with every type of plastic trash imaginable from floor-to-ceiling and wall-to-wall. V2 Solutions was the only vendor we found to actually care about where these materials went, researched appropriate solutions, and ensured the disposal was environmentally-friendly. V2 reassured us that only appropriate items would be scheduled for the landfill. This careful attention to the details of the job is why we chose V2 over others who had also bid on the job."

– Justin McKanna, Property Assistant, Management Services
NAI Hiffman

MEETING DEADLINES DESPITE JOB SIZE

We understand that time is money. Turning-around your rental space in preparation for the next tenant may involve many details, even the possibility of reconstruction and remediation. Despite the property's initial condition upon our inspection, we can provide all necessary repair work to your complete satisfaction once clearing and cleaning are finished. And because we value clear communication with our clients, we pledge to keep you apprised of each and every step.

We Care About the Environment!

COMMERCIAL/INDUSTRIAL WAREHOUSE CLEAN-OUT & RECYCLING

SPECIALIZING IN CERTIFIED WAREHOUSE CLEAN-OUT - EVEN “HAZ MAT” SITUATIONS

If you're left facing a serious volume of items abandoned by a previous tenant, V2 Solutions quickly and efficiently remediates the problem under skilled technicians – even hazardous materials requiring special handling.

From a few thousand square-feet to a 300,000 square-feet, the warehouse clean-out experts at V2 Solutions are not intimidated by job scope. Our company holds the highest levels of professional certifications so that you are assured fast and appropriate response, despite the seriousness of the situation.

EMPLOYING EARTH-FRIENDLY RECYCLING SOLUTIONS

Because handling recyclables has rules that can frequently change, trust our experts to follow the latest best practices and adhere to recommended guidelines. They'll also research solutions that not only quickly clear-out the property, but are also beneficial to the environment. If something can be reused or repurposed in a positive way, we make certain it does not end up in a landfill.

OUR PROCESS FROM START TO FINISH

- Receive initial call and arrange site visit with property management
- Determine project timeline
- Revisit site with vendors to identify and determine the following:
 - Landfill Waste
 - Hazardous Materials
 - Repurpose/ Recycle Materials
 - Coordinate with Electrical or Construction Contractors for Necessary Repairs
- Offer proposal
- Agree on start date
- Schedule vendors and staff along with equipment needs
- Start project
- Provide daily progress reports to ownership or property management
- Detailed disposal documentation and case study provided upon job completion

What Did V2 Do With 10 Million Pounds of Abandoned Plastic and Styrofoam?

The Challenge...

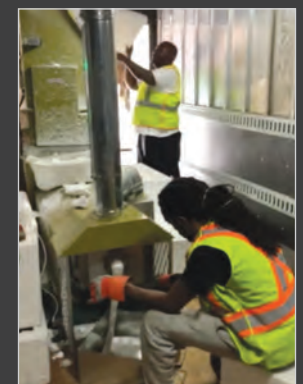

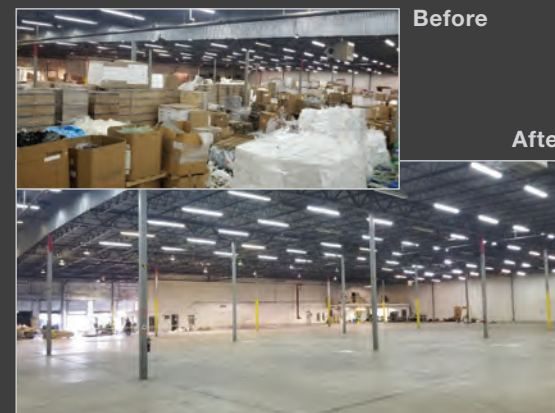

In a 150,000 sq. ft. warehouse in Romeoville, IL sat 10 million pounds of recycled plastic and styrofoam. Originally these materials were meant to be exported to China but had no place to go due to new regulations. With less than 2 months to clear out the warehouse, placing all the materials in a landfill would be the easy option, but V2 Solutions, Inc. had other ideas!

Dealing with a job of this magnitude, many unknowns, and a tight timeline, V2 knew this was a huge undertaking. Andre van Vuren and his team from V2 Solutions, Inc. along with consultant, Mike Reinert from Cardinal Recycling Co., who were too environmentally focused to simply landfill all of this material.

The Solution...

- V2 consultants quickly sourced buyers for recycled plastic
- Brought in and used an on-site mobile styrofoam densifying machine
- Utilized 300 semi-trailer truck loads to remove material
- Smart recycling diverted an additional 198 semi-truck loads from landfills

V2 Solutions, Inc. successfully sourced the recycled plastic buyers & styrofoam through their dedicated consultants ***ahead of schedule!***
